Hot and cold air containment systems designed to maximize cooling predictability, capacity, and efficiency at the rack, row or room level.

Lenovo 42U 1200 mm Deep Rack offerings are industry-standard 19-inch server cabinets that are designed for high availability server environments. They are optimized to help maximize floor ...

Panduit's Energy Efficient Data Center Cabinet System offers containment, in-cabinet ducting, and improved sealing that optimizes air separation and provide superior energy savings compared to ...

Our cabinets are the EIA standard 19" server rack. The sizes are available in 24U, 42u and 48U to get the most height out of your data center space. All of these rack options come standard with 2 vertical ...

The essential solution to airflow management is achieving isolation between chilled supply air and heated return air to eliminate hot spots, lower energy costs and achieve higher operating efficiencies. ...

Configure your enclosure with factory-installed accessories to speed deployment. How do you transform a legacy data center with more than 1,000 cabinets into a model of efficiency? Speed selection and ...

Net-Access™ S-Type Universal Cabinets are ideal for network or server application that provides effective thermal management, high density cable management and RU utilization.

A highly engineered data center cabinet solution that delivers fast, built-to-order configurability, best-in-class strength, and scalability regardless of the application.

This guide provides an overview of best practices for energy-efficient data center design which spans the categories of information technology (IT) systems and their environmental conditions, data center ...

1200mm deep energy management for airport data center cabinets

Quick-release, locking side panels give easy access; extra depth simplifies cable management and PDU installation behind equipment. Customize to the needs of your large, complex jobs with all EIA/ECA ...
