Project Overview Cascade is a 45 MWac storage project serving the CAISO market. It is located in the county of San Joaquin in California and has been in operation since 2024.

As the voltage levels for renewable energy grid integration continue to rise, high-pressure cascade energy storage technology is poised to become mainstream in grid-side energy storage, ...

Houston-based Broad Reach Power has announced the acquisition of the 25MW/100MWh Cascade energy storage project in the US. The storage project has been acquired ...

Amazon has unveiled detailed plans and renderings for the Cascade Advanced Energy Facility, an initial 320-MW small modular reactor (SMR) complex that will serve as the first major ...

Wood Mackenzie projects Q4 2025 will set a record for the residential sector as customers accelerate installations ahead of the Section 25D tax credit expiration.

Information on acquisition, funding, investors, and executives for Cascade Energy Storage Project. Use the PitchBook Platform to explore the full profile.

Overall Q3 installations increased 31% year-over-year, though the market declined 6% compared to Q2 2025's record highs. The utility-scale storage segment drove growth with 4.6 GW ...

According to the Q4 2025 US Energy Storage Monitor from Wood Mackenzie and ACP, 2025 energy storage installations surpassed 2024 capacity.

Reported October 16, 2025 - Amazon has unveiled its plans and designs for the Cascade Advanced Energy Facility, as it continues to invest into small modular nuclear reactors (SMRs) to power its AI, ...

Facility Description: Solar photovoltaic power generation facility with a nominal generating capacity of up to

2025 cascade energy storage projects

800 MW's and 800 MW's of battery storage on up to 8,075 acres (12.6 sq. miles) in Wasco and ...
