A comprehensive analysis of global module shipments from 24 prominent Chinese solar module manufacturers reveals that shipments are projected to range from 600GW to 650GW, ...

Texas is living up to its proverbial "bigness" as it is set to take over as the largest solar market in the United States. A triumphant 36 GW buildout is expected by the Solar Energy Industries ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

[Guangxi 36GW photovoltaic material industry chain project started]Recently, the 36GW photovoltaic material industry chain project invested and constructed by Dongfang Hope Group officially started, ...

TW Solar won bids for 950MW of modules in April, including 604MW from SDIC, 175MW from China General Technology Group, and 120MW from Guangdong Energy Group. In the first ...

The installed capacity of wind and solar power will be more than six times that of 2020, striving to reach 3.6 billion kilowatts. Forest stock volume will exceed 24 billion cubic meters.

The PV module procurement round was divided into three categories: 12 GW of tunnel oxide passivated contact (TOPCon) modules for self-owned projects, 36 GW of TOPCon modules for...

Opening bids for the largest centralised procurement tender in China's PV history have come in, with 51GW

36GW solar module project

each of PV modules and inverters on the table. The massive tender, initiated by...
