What equipment does a 400V tunnel need?

Within tunnels, 400V supplies are required to feed heavy plant, conveyors, compressors, pumps, fans, etc. Due to the nature of the operations, a lot of equipment needs to be plug-in or extendable, so that it can move forward with the work face.

What LV equipment do I need for a tunnel project?

A wide variety of LV electrical distribution equipment can be required on a tunnel project. Main LV supplies into tunnels are often provided with a back-up stand-by generator and our Mains Distribution Assemblies (MDAs) can incorporate Manual or Automatic Changeover systems to switch between Mains and Stand-by power.

What is a tunnel power supply & distribution?

Power supply and distribution in a tunnel Tunnels are home to a variety of applications that need to be supplied with power in a high-availability configuration. Particularly critical subsections, such as ventilation and lighting, must continue to work even in emergency situations, for example during severe fires.

What are the different types of tunnel distribution schemes?

below are some typical tunnel distribution schemes at 400V, 1000V and 3300V. 400V Distribution When tunnel distribution is carried out at 400V, Cable Link Boxes can be provided which will typically accept incoming and outgoing SWA cables with a cross section of 95mm² 4C and switchgear rated up to 250A.

Railway Tunnel Construction Protecting sensitive electronics for vital signaling and communications in a tunnel environment can present challenges. nVent SCHROFF cabinets and enclosure solutions - ...

These cabinets not only provide essential physical protection for various communication devices but also support continuous power supply through intelligent power management systems, laying a solid ...

In order to cope with the extreme conditions, BS6164 provides valuable guidance on voltages, equipment enclosures, cabling, electrical protection and lighting systems to be used in tunnels.

IRINOX designed highly customised modular cabinets containing STES systems to ensure safety in railway

400V Germany Communication Cabinet for Tunnels

tunnels.

Electrical-cabinet construction takes place at our facilities, which allows us to react accurately and quickly to last-minute change requests. This gives you a plus in flexibility and also saves you money, ...

In Delvalle we have an SOS cabinets for tunnels, which consists on an emergency station addressed to the users of the tunnel and maintenance personnel, which allows to notify and communicate about ...

Lighting network usually use 110V power supply, therefore, we designed, specially made for tunnel lighting, distribution board with internal 400V/110V transformer, backup power supply with baterries ...

Our robust industrial routers connect various networks via cable (LAN router and NAT router) or cellular communication (2G/3G/4G/5G) for the remote maintenance and protection of your local network. A ...

With a very low noise level. Economical and efficient use of energy. Thermoregulation to increase the level of protection. Schroff offers a wide variety of brands and styles of communication cabinets.

Klaus Faber AG provides you with cables and connectivity solutions for construction site power distribution, temporary cabling for large equipment and tunnel cables for the infrastructure.
