Solar Panel Coat is a nanotechnology-enabled clear coating designed to seal and protect solar panels from degradation and deterioration. Its hydrophobic and antistatic properties provide a ...

By creating a durable, protective layer that minimizes dirt accumulation, it effectively supports the long-term performance and maintenance of PV panels. The combined antistatic and anti ...

Dubbed Antistatic Solar Armor 2.0, the product has a new formula that reportedly ensures that panels stay cleaner for longer and reduces the need for frequent reapplication.

This anti-static spray can be used on fabric, clothing, under garments, furnishings etc. to eliminate static electricity and prevent static build ups, clinging and static shocks. ...

This anti-static, self-cleaning surface increases solar panel performance while minimizing ongoing maintenance by creating a micro-thin, super-slick hydrophobic surface that prevents the adhesion of ...

This environmentally friendly product is free of phosphate or chlorine, and has a neutral pH, so it does not attack the aluminum structure, silicone or anti-reflective coating of the solar panel.

Shiny Solar is a product for photovoltaic and solar module maintenance, for easy removal of grease, limestone and crystallized deposits, dust, smog, excrement, etc.

The self-leveling design of Antistatic Solar Armor ensures even coverage over the surface of your solar panels, providing uniform and effective protection against contaminants.

Enhance your solar panel maintenance with Chemitek Antistatic Solar Armor, a specialized coating designed to boost efficiency and protect panels from dirt and grime.

Learn why using anti-static protectant is crucial for maintaining the efficiency and longevity of your solar

Anti-static spray for photovoltaic panels

panels. Find out how this simple solution can save you time and money in the long run.
