In late November, the state government launched the first stage of an expression of interest (EOI) for a 50MW/500MWh (10-hour duration) VRFB energy storage project, to be built in ...

Premier Roger Cook said during the election campaign that the 50-megawatt, \$150 million battery would use locally sourced and processed vanadium. Under Labor's plan, the battery would be ...

Australia's first megawatt-scale vanadium flow battery was installed in South Australia in 2023. The project uses grid scale battery storage to store power from a solar farm.

Australian Vanadium Limited (ASX: AVL, "the Company" or "AVL") is pleased to provide an update on the progress of the vanadium flow battery (VFB) project being undertaken by its 100% owned ...

Under the agreement, the two companies will work together on project development, system deployment and long-term technical cooperation, aiming to accelerate the application of safe, ...

Western Australia's Labor government has pledged \$150 million toward constructing Australia's largest vanadium flow battery in Kalgoorlie-Boulder. With a planned capacity of 50 ...

China's Enerflow will partner with Australia's JENMI to jointly develop a 350MW/1,200MWh long-duration storage project, marking a major step for vanadium flow technology ...

The Co-located Vanadium Flow Battery Storage and Solar project by Yadlamalka Energy is an innovative renewable energy project.

In summary, the rise of vanadium flow batteries in Australia signals a promising shift in the energy storage landscape, offering cost-effective, reliable, and sustainable solutions for a variety of ...
