If your base unit is not receiving power then you can try to have the base unit plugged on a different power outlet to test. If you have multiple handsets, you can try to use the AC adapter from one of the ...

Check that you have suitable batteries in your base station and that they are inserted correctly into the battery compartment. Ensure all your sensors are connected and within your base ...

If this does not resolve the issue, it may indicate that the base station is defective, and the entire system would need to be replaced. It's not possible to purchase just the base, and repairing it would likely be ...

Next, make sure the phone is placed in the base for at least 5 minutes to reset its connection to the base, and then try placing a call after. If the problem still persists, there could be ...

To remedy this, take a wire brush and clean both the battery terminals and wiring harness ends, reconnect tightly and give it another shot. If the terminals are covered with a white crumbly ...

Using an adaptor from another device may fit the socket but might not provide the right voltage, leading to this message. Check the model number on the adaptor label and compare it with your base unit's ...

If there is a technical issue with the batteries, or if the Base Station is having trouble keeping them charged, you may receive a Keypad warning or Base Station announcement to notify you of the ...

Next, make sure the phone is placed in the base for at least 5 ...

If your electric baseboard heater is not producing heat or is cutting out due to an "out of range" or "no power at base" error, the first thing to do is to check the power to the heater itself. Make sure all ...

The "Base no power" message indicates the base unit isn't receiving power. First, check the power adapter and ensure it's firmly connected to both the base and the outlet.

Base station battery has no voltage

Check the power source: Make sure that the charging cradle is plugged into a working electrical outlet or power source. If the outlet is not working, try plugging the cradle into a different outlet. If available ...
