The 70 million dollars micro-grid project will be built by Leclanch& #233; on 100 acres of crown land located in the Royal Basseterre Valley National Park utilizing a lease agreement. ...

With the integration of SYG TECH's wind turbine, solar energy, and storage solutions, the feasibility study indicates that the port's microgrid has the potential to become 100% carbon neutral.

That's the story unfolding in Basseterre, where the energy storage industry is rewriting the rules of power reliability. With a global energy storage market valued at \$33 billion annually [1], this ...

The CREF Industry Awards were established to recognize leaders in the Caribbean energy sector who are making a lasting impact on the development of resilient and renewable energy systems in the ...

The pilot project will install and integrate a Vertical Axis Wind Turbine, at the SCASPA Sea Port microgrid with aim to reduce 46% of the port's GHG emissions. The technology encompasses a ...

The adoption of this microgrid system will help integrate renewable energy into the port's overall energy mix, advancing the maritime energy transition in line with the IMO GHG Strategy.

St Kitts and Nevis: The construction of the much-awaited Basseterre Desalination Plant is now over 70% completed, as announced by Prime Minister Dr Terrance Drew.

SYG TECH wind turbine technology has been developed with this intention in mind. The simple solution we present in this project makes wind energy applicable to microgrid power generation in many ...

A microgrid, regarded as one of the cornerstones of the future smart grid, uses distributed generations and information technology to create a widely distributed automated energy delivery network.

The initiative, led by SYG TECH, will implement a renewable energy-powered microgrid featuring innovative

Basseterre microgrid development

Vertical Axis Wind Turbine technology, designed to withstand the region's harsh ...
