“To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy ...

Its stand-alone energy storage capacity is up to 9MWh, capable of charging approximately 150 domestic electric vehicles or powering an average German household for six years.

Contemporary Amperex Technology Co. Limited (CATL) has launched the world's first 9MWh ultra-large capacity energy storage system, the TENER Stack, at the ees Europe 2025 ...

With a storage capacity of up to 9 MWh, the system can charge about 150 regular electric vehicles (EVs) or power an average German home for six years, according to CATL. Deploying 800 ...

Compared to traditional 20-foot container systems, it boasts a 45% increase in space utilization and a 50% boost in energy density. With a single-unit capacity of 9MWh, the system can ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry benchmark with ...

On April 9, CATL unveiled TENER, the world's first mass-producible energy storage system with zero degradation in the first five years of use in Beijing, China.

The solid-state battery energy storage system it develops and produces has the characteristics of high safety, large capacity, and long cycle life. At the same time, it also has industry ...

At ESS Europe 2025, Chinese battery giant CATL made headlines by unveiling the world's first 9MWh ultra-large capacity energy storage system solution, the TENER Stack.

Beijing Mobile Energy Storage Container with Ultra-Large Capacity

TENER Stack incorporates CATL's high-energy-density cells with five-year zero degradation technology, achieving a 45% improvement in volume utilisation and a 50% increase in ...
