How much electricity is generated in Belarus in 2025?

Belarus: In Belarus, electricity generation in the Energy market is projected to reach 45.17bn kWh in 2025.

Definition: The energy market is a broad term that encompasses all forms of energy, including fossil fuels, renewable sources, and nuclear power.

What is the energy sector in Belarus?

Belarus's energy sector is dominated by state-owned companies operating under supervision of the Ministry of Energy in electricity, gas and part of the heat sector, and under BelNefteKhim (Belarus State Concern for Oil and Chemistry) in the oil, refining and petrochemicals sector.

What percentage of Belarus's energy is renewable?

Renewable energy generation accounted for 6% of Belarus's energy in 2018, rising to 8% in 2020, mostly from biofuels and waste. Renewables share in electricity generation was 2% in 2018 (0.8 TWh). Renewable energy includes wind, solar, biomass and geothermal energy sources.

How much energy does Belarus use?

Total energy consumption (measured by total primary energy supply) in Belarus was 27.0 Mtoe in 2018, comparable with consumption in Norway and Hungary. The industry sector is the largest final energy consumer with a 36% share (7.3 Mtoe in 2018); it is also the greatest consumer of electricity and heat.

The country is one of the world's largest importers of natural gas with estimates for 2018 being about 17 Mtoe (20 billion cubic metres [bcm]) of natural gas, making it the leading importer among the so-called EU4Energy countries: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. In 2018 almost all generated electricity came from natural gas (97%, or 39 terawatt hours [TWh]). In 1990, the IEA reported natural gas as constituting 52% of electri...

6Wresearch actively monitors the Belarus Electric Power Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.

Amidst limited natural resources, Belarus continues to manage its energy needs through domestic production and imports, with a focus on developing renewable energy sources such as hydro, wind, ...

Belarus electricity market

Belarus energy profile - Analysis and key findings. A report by the International Energy Agency.

The market is highly complex and constantly evolving, with factors such as government policies, technological advances, and environmental concerns affecting supply and demand.

The report provides a strategic analysis of the electrical energy market in Belarus and describes the main market participants, growth and demand drivers, challenges, and all other factors, influencing ...

These interactive charts show the electricity mix of the country. One is presented as a stacked area chart, allowing us to see a full breakdown of the sources of electricity in the supply. The line chart ...

In the absence of a legal framework on power sector market relations, Belarus will have to finalise its draft Law on the Electric Power Industry so that Belarusian companies may participate ...

Renewable energy generation accounted for 6% of Belarus's energy in 2018, rising to 8% in 2020, mostly from biofuels and waste. Renewables share in electricity generation was 2% in 2018 (0.8 TWh).

After the de-synchronisation of Ukraine and the Baltic states, Russia has become Belarus's sole electricity trading partner. Despite the recent common market agreement, trade volumes are ...
