Brupower is an energy cooperative active in Brussels, which brings together citizens to invest together in renewable energies: all members are co-owners of production facilities.

Looking for reliable outdoor power solutions in Brussels? Discover expert-curated brand recommendations and essential buying insights tailored for residential, commercial, and industrial ...

Initially, the projects in the Brussels Capital Region are focused on solar (photovoltaic) panels, but in time, brupower would like to explore more options for renewable energy.

Elia is a Belgian transmission system operator for high-voltage electricity (30,000-380,000 volts), located in Brussels, Belgium. It operates in Belgium and Germany. The company transmits electricity from generators to distribution system operators, which then supply SMEs and homes. Elia also has contracts with major industrial users that directly connect to its high-voltage grid.

The EMPOWER pilot, involving three Brussels municipalities (City of Brussels, Ixelles, and Schaerbeek), addresses barriers to implementing energy sharing projects and achieving local energy independence.

With 38% of public spaces requiring 24/7 power access, the city's aging infrastructure struggles to balance reliability and sustainability. Let's explore how modern outdoor power solutions are rewriting ...

The completed park will have a power capacity of 700 MW and a storage capacity of 2,800 MWh, enough to power 385,000 households for a year, according to Sweco. The facility will provide stored ...

The project aims to reduce CO2 emissions, strengthen energy independence and improve the quality of life of Brussels public authorities and citizens, while providing an inspiring model for other European ...

Brussels-based renewable energy cooperative Brupower is aiming to raise EUR800,000 in citizen capital by the end of the year, to fund the rollout of solar panels on city rooftops that can ...
