---

This expansion covers five facilities across four islands, combining new wind capacity on Santiago with battery storage systems on Santiago, Sal, Boa Vista, and S#227;o Vicente.

The Cabeolica wind farm, set across four islands of the Cape Verde archipelago, has led the way in wind power generation in Africa. The project company, Cabeolica S.A., was established by the founding ...

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an ...

The project advances Cape Verde's goal of generating 50% of its electricity from renewable sources by 2030, as well as its Nationally Determined Contribution under the Paris ...

This new project will finance the expansion of promoter's existing windfarm in Santiago island and the installation of at least two Battery Energy Storage Systems (BESS) in Cabo Verde.

Cape Verde has inaugurated a major expansion of its flagship Cabeolica Wind Farm, adding new wind capacity and one of Africa's most advanced battery energy storage systems ...

As part of its efforts to scale renewable energy, stabilise its grid and reduce carbon emissions, Cape Verde has inaugurated the expanded Cabeolica Wind Farm and a new Battery ...

Through the significant financing provided by the AFC, the project has been developed at a rapid pace, bringing the wind complex online ahead of schedule and reasonably within budget. ...

The project marks a significant milestone as Cabo Verde's first large-scale renewable energy initiative to combine wind power generation with battery energy storage systems (BESS).
