Joint Crediting Mechanism (JCM) is a mechanism in which Japan contributes to reduction and absorption of greenhouse gas emissions globally by establishing systems to transfer technologies ...

CHIMEI prioritizes the core element of "clean production" and the sustainable management of energy resources. We made full use of the roof space of the factory and install solar panels, with the ...

Shanghai Electric Power Generation Engineering Company is one of the core businesses of Shanghai Electric Group, a large equipment manufacturing conglomerate in China.

Located in the tropical region of Thailand, Chiang Mai offers an optimal environment for solar power generation due to its year-round abundant sunlight. The average energy production per kilowatt of ...

Turbine driven generators Most U.S. and world electricity generation is from electric power plants that use a turbine to drive electricity generators. In a turbine generator, a moving ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...

Coming soon in November 2022, the cogeneration plant will be able to generate 85% of our energy needs alongside 66% of our steam. The plant will be fueled by natural gas and use turbine fans to ...

Profited by directly spraying or taping a solar-thermal layer on ss-CPCM surface, the photothermal energy absorption and conversion ability of ss-CPCMs is immensely improved.

Chiang Mai University Solar PV Park is a roof-mounted solar project. The project generates 18,300MWh electricity thereby offsetting 18,250t of carbon dioxide emissions (CO₂) a year.
