If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Damascus, Syria.

The solar energy sector in northeast Syria faces weak regulatory oversight and fragmented governance, allowing counterfeit and low-quality products to flood the market.

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

The project aims to showcase how solar energy can act as a key driver for rebuilding Syria's energy infrastructure, promoting economic recovery, and reducing greenhouse gas emissions.

Investment is beginning to return to the country with the lifting of U.S. sanctions, and major energy projects are planned, including an industrial-scale solar farm that would secure about a...

This investigation is based on interviews with 25 individuals, including loan beneficiaries, engineers, contractors, importers, and bankers, as well as an extensive review of official decisions ...

Damascus launches a fixed-tariff scheme for 2-10 MW green power and signs a deal with 20Solar Energy to build twin 100-MW solar plants, one with battery storage. Syria has taken its most ...
