What is Uni Solar?

UNI-SOLAR is the world's largest producer of flexible solar panels with a light, durable product that provides more total energy production than any other solar panel on the planet. And, thanks to the combined technological know-how of UNI-SOLAR and our parent company Energy Conversion Devices (ECD), our product line just keeps getting better.

Why should you choose Uni Solar?

And, thanks to the combined technological know-how of UNI-SOLAR and our parent company Energy Conversion Devices (ECD), our product line just keeps getting better. Another ECD company, Solar Integrated, gives us the expertise to install UNI-SOLAR products globally, on any roof under the sun, which means a full-circle solar solution for you.

What is Uni Solar PVL?

UNI-SOLAR brand products are the world leader in flexible solar modules. The UNI-SOLAR photovoltaic laminate (PVL) is the only flexible photovoltaic product produced in commercially viable volumes.

What is Uni Solar photovoltaic laminate (PVL)?

The UNI-SOLAR photovoltaic laminate (PVL) is the only flexible photovoltaic product produced in commercially viable volumes. UNI-SOLAR laminates are well-suited to the commercial roofing and building-integrated photovoltaic (BIPV) markets, as they integrate easily into most commercial roofing materials.

UNI-SOLAR laminates are unique in that they perform better in low light conditions and in hot environments. Because of our amorphous silicon technology, the performance of our product does ...

The foundation of all UNI-SOLAR products is their unique Triple Junction amorphous silicon solar cell. Amorphous construction allows lower costs, and a flexible substrata with DuPont Tefzel glazing ...

The pre-wired UN-SOLAR solar electric module converts sunlight to electricity, charging batteries during the daytime for lighting use at night. It is lightweight and durable. There are no glass or fragile ...

The UNI-K iDD is Changan's first model to be equipped with Changan's Blue Whale iDD hybrid system. The

Does Uni-K have solar power generation

iDD is aimed to contribute to fuel saving and low consumption rather than electromobility and ...

We will lead by offering the lowest cost of energy for rooftops enabled by solar, developing a platform for providing building and homeowner energy savings.

UNI-KIT solar lighting systems are designed for use in remote homes, cabins, construction sites and other remote areas without access to the power grid. The UNI-KIT is a durable lighting system ...

New solar roof can produce 1,600 usable hours of electricity annually with a cost savings of more than \$60,000 per year.

UNI-SOLAR laminates are well-suited to the commercial roofing and building-integrated photovoltaic (BIPV) markets, as they integrate easily into most commercial roofing materials.

Specs of ChangAn UNI-K iDD 1.5T (282 Hp) Plug-in Hybrid Automatic /2022, 2023, 2024, 2025, 2026/ ...
Compare

All solar panels are rated in terms of peak power output (watts). Outdoors, under normally higher operating temperatures, solar panel performance changes, depending on temperature, solar ...

The Changan UNI-K is the second product of its freshly unveiled UNI-series, following the UNI-K compact crossover. The UNI-K was first previewed by the Changan Vision-V Concept unveiled at the 2020 Beijing Auto Show in September 2020, and was rumored to be called the UNI-V before the official reveal. The production version of the fuel version Changan UNI-K was introduced at the 2020
