What is Emtel super-capacitor based energy storage?

Our diverse portfolio includes power planning for telecom, data centres, micro-grid, and off-grid EV chargers designed to reshape the energy landscape. An Emtel Super-capacitor based energy storage can carry an impressive 500,000 life cycles, surpassing the regular batteries that typically manage only 6,000 cycles.

What is SuperCap energy storage?

Dubai-based supercap energy storage manufacturer Enercap Holdings and Abu Dhabi-based Apex Investment, a leading diversified investment holding company, have formed a joint venture to build 16GWh per year manufacturing capacity of supercap energy storage, a cutting-edge technology with features that surpass the commonly used lithium-ion technology.

Does enercap have a manufacturing facility in Dubai?

Additionally, Enercap Energy Holding Limited has agreed to acquire an existing manufacturing facility in Dubai Industrial City (DIC), which will be upgraded to 6GWh/year capacity. Enercap has a current global demand of over 30GWH of large-scale battery energy storage systems (BESS).

What are graphene supercapacitor energy storage modules?

Introducing Graphene Super Capacitor Energy Storage Modules - in a variety of configurations suitable for any application. Supercapacitor Pouch Cells 2.3V / 14Ah. Each battery pack consists of 200 Pouch Cells. Each unit has 19 battery packs and one high-voltage control box. With 10 units in parallel, the total system energy is 1.22MWh.

Supercapacitors give improved performance and deliver bursts of power quickly for heavy loads. Reduced battery maintenance also reduces the overall cost of operation and ownership.

Proud to see our ENCAP Electrostatic Supercapacitor Module performing flawlessly at an off-grid telecom site in Dubai -- even in 51°C heat with no active cooling.

Known for its highly specialized supercapacitor base batteries, Vaults Energy serves the automotive, industrial, consumer electronics, telecom, and transportation industries.

Dubai Communication Base Station Supercapacitor Module

As Dubai accelerates its transition to smart cities and renewable energy adoption, supercapacitor manufacturers are playing a pivotal role in powering this transformation.

Supercapacitors | Nature Communications Sep 26, 2025 · Miniature asymmetric supercapacitors have higher voltage and energy density but are often limited by a complex manufacturing process and ...

This is the best electrostatic Supercapacitor energy storage system with 500,000 life cycles for commercial and residential power needs. ENERCAP, a global partner of Emetel Energy ...

Enercap, founded by Qureshi, is the inventor and manufacturer of supercapacitor-based energy storage, a cutting-edge technology with features that surpass the current lithium-ion ...

With increasing emphasis on clean energy, industries are integrating supercapacitors to power microgrids and EV charging stations, ensuring uninterrupted and high-speed charging.

Supercap energy storage, developed by Enercap in the UAE, meets these demanding requirements - long life, no capacity degradation, safe, environmentally sustainable and recyclable, ...

Supercapacitor modules can be configured in series to increase the working voltage, which is referred to as a module string. Individual modules or strings of modules can be configured in parallel to meet ...
