In an increasingly unpredictable global energy landscape, enabling firm, clean power isn't just a technical breakthrough, it's a strategic imperative. By integrating long-duration storage with ...

From tailor-made solutions that integrate energy production and deliver industrial fluids such as heat, cold, or compressed air, up to maintenance, digitalization, and financing services, ...

ENGIE, a French energy giant, on Thursday said it has secured 280 MW/2 hours of battery storage capacity in a Gujarat Urja Vikas Nigam (GUVNL) auction, marking the company's ...

As a strategic growth market for ENGIE, the Group aims to increase its installed renewable energy and storage capacity in India to 7 GW by 2030. This new development also ...

The award involves a solar-plus-storage configuration with six hours of storage. The project adds to the company's growing renewable and storage portfolio, where it has close to 2 GW ...

The need for battery storage solutions is increasing in line with the stronger penetration of renewables. The transition to a low-carbon economy and higher electrification implies the deeper integration of ...

ENGIE has been awarded its first hybrid project in India, combining 200 MW of solar PV with 100 MW / 600 MWh of battery storage. This project will enable the storage and supply of up to 6 ...

As demand for renewable energy surges across North Asia, large-scale energy storage solutions like the North Asia Energy Storage Power Station Project have become critical.

Engie has won its first solar-plus-storage project in India, while Larsen & Toubro (L& T) has secured an order from Torrent Energy Storage Solutions to build the country's largest pumped ...

ENGIE Energy Storage Projects in North Asia

ENGIE has secured a 200 MW solar project paired with a 100 MW/600 MWh battery energy storage system (BESS) in India. The project was awarded through a competitive bidding ...
