Is it necessary to modernize the grid?

According to Mark Buckner, power and energy systems group leader at Oak Ridge National Laboratory (ORNL), grid modernization is necessary to continue to allow anticipated growth in renewable and other energy sources. Buckner, with a doctorate in applied artificial intelligence, previously worked in the machine learning area of ORNL.

What is the Grid Modernization Initiative?

The Grid Modernization Initiative is an effort by the U.S. Department of Energy (DOE) to meet the challenges of modernizing and upgrading our electricity infrastructure. It aims to enable a more reliable, resilient, and sustainable system.

Why do we need a unified grid?

The importance of this project lies in strengthening the unified grid to absorb the expected renewable energy capacities, therefore contributing to solving the electricity outage issue and securing the country's electricity needs.

When will 'nwfe' projects be connected to the national electricity grid?

H.E. Dr. Rania A. Al-Mashat, Minister of Planning, Economic Development, and International Cooperation, stated that four projects listed under the energy pillar of the 'NWFE' program will be connected to the national electricity grid by the upcoming summer.
