What is the longest range electric car in 2023?

Now that the 520-mile Dream Edition is out of production, the longest range version of the 2023 Lucid Air is the 516-mile Grand Touring sedan. That still puts the Air ahead of the pack by a healthy margin. With more than 100 more miles than Tesla's Model S, the Lucid is the longest ranged electric car you can buy today.

How far can an electric car go in 2024?

In 2024, the average range of an electric car was 283 miles compared to 2014 where this was 84 miles. And it doesn't stop here! Efficiency, charging speeds and battery longevity have all seen incredible improvements - making the choice to switch to an EV easier, even for the more sceptical consumers.

How far can electric cars go on a single charge?

The average range of modern electric vehicles has increased by over 140% in the past decade, with many 2025 models exceeding 300 miles on a single charge and premium options approaching 500 miles.

Which electric car has the most EPA range?

You'll notice that the biggest underperformer is the electric Mercedes-Benz G-wagon, which achieved a mere 67 percent of its EPA range in our test (160 miles to its 239-mile EPA range). But it makes sense that this brick-shaped vehicle would do comparably worse at the higher speed of our test.

We explain EPA ratings, factors affecting range, how EVs performed in our testing, and why it's all complicated and different from the gas-powered-vehicle norm.
