Is Tirana a sustainable city?

The needs and challenges that Tirana, as the largest city and the capital of Albania, faces in terms of the improvement of the mobility system are given in the plan for the sustainability of urban mobility.

How much green space does Tirana have?

Studies for Tirana indicate the ratio of open green space for 100,000 inhabitants is only 4.6ha, which is a low value. Also, since 2013, 2 monitoring stations installed within the urban area of Tirana indicate a very high level of air pollution.

What challenges does Albania face in ensuring green transition benefits all populations?

Albania faces challenges in ensuring the green transition benefits all populations. Energy poverty is widespread, particularly in rural areas, with vulnerable groups being disproportionately affected by transition costs.

Will sustainable food systems help Albania achieve the 2030 Agenda?

As Albania nationalised all the sustainable development goals (SDGs) and the vast majority of the SDG targets, the integration of the concept of sustainable food systems into plans for the implementation of the SDGs will help Albania carry out all aspects of the 2030 Agenda.
