For generator rooms, you need enough air changes to clear out heat and fumes effectively. It's a bit like airing out a steamy bathroom--open the window too little and it fogs up, but ...

I really like the looks of the Zard exhaust, I think it preserves the original esthetic of the XDS design. I am in the market for a new exhaust and really appreciate this thread. No doubt the ...

When discharging air vertically, because the generator is surrounded on all sides, can result in higher than ambient air temperatures being pushed into inlet vents.

For generators located indoors, ventilation must be considered, heat from engine radiator, alternator, and exhaust system must be vented to atmosphere to obtain proper room temperature.

Found this picture on another social media platforms. It seems to Akrapovic have made an exhaust for the Xdiavel. Have no more info, only picture But personal not sure of the design.

So this was a thing I did on a couple of my previous bikes. The best results were on my 2002 Yamaha Road Star Warrior - enormous can on that bike. I like the sound of the Termignoni ...

In this article, we'll explain why ventilation matters, how to position your generator safely, and what signs to watch for if ventilation isn't working properly. These tips help prevent carbon ...
