Can solar panels and batteries save money in California?

Pro tip: In California, homeowners combining solar panels and batteries can save up to \$10,000 with SGIP and federal incentives together. The type of battery you choose impacts both the upfront cost and long-term value. Here's a 2025 comparison by chemistry:

How much does a solar battery cost in 2025?

In 2025, a typical solar battery installation costs \$9,000-\$18,000 before incentives and \$6,000-\$12,000 after credits. By 2026, continued cost declines are expected to make home energy storage even more accessible, with prices averaging 8-12% lower than current levels.

How much does it cost to install a solar battery?

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. After applying the 30% federal tax credit, most homeowners pay \$6,000 to \$12,000 for a complete setup. For a deeper dive into specific models and performance, explore our Best Solar Battery for Home guide.

What is a solar battery box?

This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box". Some battery boxes are large enough to be considered battery cabinets and are usually made from painted steel. Battery enclosures keep your batteries safe from weather and safe from theft.

We offer home solar and battery storage across Georgia protected by our leading 25-year warranty. Learn more about GA home solar panels, incentives, cost, tax credits, rebates, frequently asked ...
