Average battery pack prices were lowest in China, at \$84/kWh. Pack prices in the North America and Europe were 44% and 56% higher, reflecting higher local production costs and greater ...

Lithium prices corrected sharply, driven by a speculative unwind following a recent rally. Markets are reconsidering the magnitude of near-term demand, as slowing passenger EV growth ...

While the pace of decline is slowing, the downward trend in battery costs will continue, driven by manufacturing overcapacity, LFP technology adoption, and ongoing technological ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

Battery prices are forecast to drop next year due to a glut of manufacturing capacity in China, increased competition and a shift to lower-cost technology.

Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.

Lithium powers lithium-ion batteries for EVs, energy storage, and electronics. Trusted price data help producers and buyers meet rising demand in the global clean energy transition.

BloombergNEF finds 2025 lithium-ion battery pack prices dropped to \$108/kWh amid LFP shifts and overcapacity; China saw the steepest declines.

Prices for individual battery metals temporarily rose during the year. BloombergNEF identifies several risks in the supply chain, including issues in Chinese lithium mines and restrictions ...

Global Energy Storage Lithium Battery Prices

The price of battery packs has decreased by 75 percent in the last 10 years, as this energy storage technology has become increasingly important in the electric mobility and renewable...
