In the past year, 34 countries in the world have installed photovoltaic capacity of more than 1GW, and 23 countries have installed a total of 10GW of photovoltaic installed capacity.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our World in Data.

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This figure visualizes the top 15 countries by cumulative megawatts of photovoltaic (PV) and ...

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

This treemap chart shows the state of the world's solar photovoltaic (PV) installations as of 2024, broken down by region with the top 15 countries labeled. The chart's yellow labels indicate ...

Global ranking of photovoltaic panel installation area
