What is a goodwe BT series inverter?

The GoodWe BT series is an AC-coupled retrofit inverter, which is able to upgrade existing three-phase on-grid PV systems to storage systems. The AC-coupled solution can transform any three-phase on-grid PV system into an energy storage system with batteries, enhancing grid independence and self-consumption.

What is a goodwe em series bi-directional energy storage inverter?

The GoodWe EM series bi-directional energy storage inverter can be used for on-grid PV systems, with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid or charge the battery, depending on the economics and set-up.

What is the goodwe EH series?

The GoodWe EH Series is a single-phase, grid-tied inverter that includes a "Battery Ready" option for users who might wish to add a full energy storage solution in the future. By simply purchasing an activation code, the EH can easily be upgraded to a complete energy storage solution.

What is a goodwe EH series inverter?

With UPS-level switching, the ET can provide savings when connected to the grid, or off-grid independence and security when the grid is down. The GoodWe EH Series is a single-phase, grid-tied inverter that includes a "Battery Ready" option for users who might wish to add a full energy storage solution in the future.

Chinese inverter and energy storage manufacturer GoodWe has launched a new generation of its ESA series residential all-in-one energy storage solution.

New three phase ESA all in one system integrates solar, storage and energy management in a single modular solution. Designed for easy installation and flexible expansion up to 108 kWh of ...

GoodWe introduces its three-phase ESA all-in-one system for residential and small commercial use, delivering efficient, scalable energy storage solutions.

The GoodWe ET series is a Three-Phase, high-voltage, energy storage inverter that provides enhanced energy independence and maximises self-consumption for reduced electricity bills, through an export ...

GoodWe ET photovoltaic energy storage system

The GoodWe ES series bi-directional energy storage inverter can be used for both on-grid and off-grid PV systems, with the ability to control the flow of energy intelligently.

At Intersolar Europe 2025, GoodWe has unveiled ESA storage systems, GT inverters, and EV-ready solar carports, and has released its ESG report with new partnerships.

This flexibility allows families to customize storage for anything from essential backup power to covering the entire home's daily energy use. Installation is quick and convenient. With one ...

Following the strong market response to its single-phase ESA Series, GoodWe today announced the launch of its new three-phase All-in-One solution designed for residential and small ...

GoodWe demonstrated its leadership position in the global energy storage market at Renewable Energy India (REI) Expo 2025 with a new suite of solar-plus-storage technologies for ...

With support for up to six inverters and 288 kWh of storage, the system scales to meet larger applications. Both inverters and batteries carry an IP66 rating, allowing for indoor or outdoor ...
