Guyana's power grid is in a severe state of disrepair and needs to be modernized. Approximately 26 percent of the power generated by GPL is lost due to inefficiencies in the grid.

The Guyana Energy Agency reported a pilot project for a wind turbine in Guyana's east coast. This is a small project with expected energy savings of around US\$30,000, and a payback period of 40 months.

The government is pouring tens of billions of dollars into Guyana's electricity system in 2026, signalling its most aggressive push yet to stabilise the national grid, expand generation and ...

Development of Microgrids For Outlying Regions
Development of Hydropower
Development of Wind and Solar Farms
Energy-Efficient Technologies
Installation, Extension, and Upgrading of Distribution Networks
Economic development in Guyana's outlying regions is stymied by a lack of reliable electricity. These areas often have small populations, however their locations and/or natural resources make them attractive sites for investment. GPL loses approximately 26 percent of the power it generates due to inefficiencies in the power grid and transmission li...
