How much does a 1kW Solar System cost?

In 2025, a 1kW solar system in the U.S. typically costs between \$2,500 and \$3,500 before any discounts, with prices averaging \$2.50 to \$3.50 per watt for home setups. This covers the panels and installation. Costs can differ depending on where you live, the type of panels, and the company you choose. The good news?

What is a 1kW Solar System?

A solar panel is the main component of a solar system, as it is responsible for capturing and converting the energy from the sun into usable electricity. The larger a solar system is, the higher its price will be. So, if you're looking for a cost-effective way to get started with solar, a 1kW solar kit is the most suitable solar option.

Can a 1kW solar system save you money?

One of the major advantages of installing a 1kW solar system is the potential for long-term savings on electricity bills. On average, a 1kW solar system can save homeowners up to \$310 per year. Over the 25-year lifespan of the solar panels, this translates to a total savings of \$7,756. If playback doesn't begin shortly, try restarting your device.

Is a 1kW Solar System a good choice?

The larger a solar system is, the higher its price will be. So, if you're looking for a cost-effective way to get started with solar, a 1kW solar kit is the most suitable solar option. Solar panels 1kW won't require a significant initial investment, making them an affordable option for many homeowners.
