Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

How long does a lithium battery last?

Standard warranties for lithium-ion batteries cover both performance and defects for two years. Extended warranties can be purchased, but a warranty beyond 10 years does not make much sense because so much of the battery would need to be replaced after year 10. Insurance can also be purchased for longer coverage.

How long does a battery warranty last?

A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

Does a battery warranty cover labor costs?

Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. Comparisons should focus on product warranty terms, end of warranty capacity, labor warranty terms, and transferability. Based on our ranking system, SolaX Power has the strongest overall warranty.

Replacing batteries in energy storage systems is like changing the heart of a power station--it needs precision, planning, and expertise. Whether you're managing a solar farm, grid-scale storage, or ...

To evaluate lithium-ion battery warranty options, consider coverage details, warranty duration, performance guarantees, customer service, and terms for replacement or repair.
