-----

The implementation of the new quota system comes with the removal of the cap on the maximum installed capacity of the Rooftop Solar Systems (which was set at 100% of the connected ...

The Indonesian government has announced a national rooftop solar power quota plan, allocating a total of 901 MW for this year in 11 regulated regions, with annual increases planned to ...

Minister of Energy and Mineral Resources (ESDM) Regulation No. 2/2024 sets new rules for rooftop solar power (PLTS Atap) in Indonesia. On-Grid and Hybrid systems now require PLN ...

A Catalyst for Indonesia's Clean Energy Goals with Java rooftop solar This 500 MW initiative is a critical step toward achieving Indonesia's goal of sourcing 23% of its energy from renewables by ...

Indonesia is moving to speed up its shift toward clean energy by proposing a major increase in its rooftop solar power quota. The Ministry of Energy and Mineral Resources has put ...

Indonesia surpassed 1 GW of cumulative solar capacity in 2025, with an estimated 546 MW of added solar last year, led by deployments in the rooftop C& I segment.

Indonesia's solar capacity reached 1.49 GW in 2025 after adding 546 MW, a growth largely fueled by commercial and industrial (C& I) rooftop installations as businesses seek ...

Indonesia's cumulative solar capacity stood at 1.49 GW by the end of 2025, according to figures from the country's Ministry of Energy and Mineral Resources (MEMR).

Indonesia stands at a critical juncture in its renewable energy transition, with rooftop solar photovoltaic (PLTS Atap) systems emerging as a key solution to accelerate solar energy adoption.

The push for an expanded quota follows a period of significant growth in rooftop solar adoption in Indonesia.
