Energy Storage Ireland (ESI), the industry body representing the energy storage sector in Ireland, has called on the Irish grid operator EirGrid to deliver the Government's target of 500 MW of ...

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that promises to store...

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of clean energy ...

Silvermines Hydro is a hydroelectric pumped storage power project located in Silvermines, County Tipperary, Ireland. It aims to turn a former mine site into one of Ireland's leading clean energy facilities.

Plans to establish a EUR650m hydroelectric pumped storage power project located at the former mine site in Silvermines, Co Tipperary, have taken a major step forward.

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

The Silvermines Hydroelectric Energy Storage Project, when operational, will be able to store as much as 296 Megawatts (MW), with a daily storage capacity up to 2,175MWh of electricity. ...

This brochure highlights the benefits that energy storage can bring to Ireland in terms of security of supply, electricity price reductions and renewable energy integration.

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

Analysis being conducted by ESI suggests that Ireland is going to need up to seven times more energy storage

Irish mine energy storage system

than what is being stored today. "That said, the Government does realise that, ...
