-----  
How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Why are battery storage projects growing in Japan?

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity.

A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage ...

27 grid-scale BESS projects secure 34.6B yen through METI's FY2024 storage subsidy program Enehub Archive &#183; January 27, 2025

ESN Premium's deep dive into Japan continues with a look at the complexities of an evolving market underpinned by strong drivers for energy storage.

Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which

# Japan's energy storage project allocation ratio

outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021. The ...

It's no surprise that as METI launched an entirely new "green" capacity auction system this year, officials made sure to allocate up to a quarter of its initial 4 GW on offer to battery and other ...

A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW. ...

12 grid-scale BESS projects totaling 180MW/595MWh secure 13B yen from Tokyo's FY2024 subsidy scheme Enehub Archive &#183; March 7, 2025

While Japan's electric vehicle adoption trails behind China and Europe--EVs make up less than 1% of its total vehicles--the country's energy storage configuration ratio tells a different story.

Despite decreasing energy consumption across business, household, and transportation sectors, Japan is seeing major investments in battery storage systems to support its growing ...

In this final blog post of our Solar + Energy Storage series, we will discuss how to properly size the inverter loading ratio on DC-coupled solar + storage systems of a given size.

Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...
