The auction aimed to allocate 100 MW of solar photovoltaic (PV) capacity, attracting bids from 24 companies. Final results are anticipated soon, with the winning developers expected to build ...

To increase the production of renewable energy and reduce the environmental impact of the coal operations for power generation in Kosovo

Unisolar has successfully completed a landmark 7.4 MW solar project in Kosovo, marking a significant milestone in the nation's ongoing transition toward renewable energy.

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic ...

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic system in ...

The overall objective of this activity is to support the Government of Kosovo (GoK) and USAID in assessing the potential to expand renewable energy source (RES), focusing particularly on solar ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo.

The aim of the project was to design a techno-economically optimal PV-system at The University of Prishtina and to investigate the potential technical, social and economic impacts of implementing PV ...
