-----  
What is Lao energy policy?

The purpose of the policy is providing guidance and reference on hydropower sector investment as well as to inform and encourage project developers/investors to be aware of the Government policy on sustainable development in Lao PDR. Household electrification is also an important aspect of Lao energy policy.

What is Lao PDR's energy policy?

The first priority of Lao PDR's energy policy is to provide reliable, affordable, and sustainable electricity to ensure economic growth and to reduce poverty. The main focus areas are to increase the electricity access and hydropower development.

Does Lao PDR still rely on oil?

Indeed, Lao PDR's energy supply security will remain vulnerable for an extended period, as its increasing oil consumption suggests that Lao PDR's 100% reliance on oil imports for finished fuel products may persist well past 2050 (Kimura, Phoumin, Purwanto, 2023).

Does Lao PDR obligate oil companies to stockpile oil for national security?

By law, Lao PDR does have the authority to obligate oil companies to stockpile a certain amount of oil for national security. Yet to address all aspects of oil supply security, Lao PDR must determine whether it has other, adequate measures to handle an emergency.

USAID Laos Energy Security, a five-year activity funded by the United States Agency for International Development (USAID), supports the Government of Laos (GOL)" efforts to improve the planning, ...
