In June 2025, GSL ENERGY completed the deployment of a large-scale commercial and industrial (C& I) energy storage system for a manufacturing facility in Lebanon.

As Lebanon eyes 2025 as a pivotal year for its hydrogen energy storage ambitions, the country stands at the crossroads of ancient energy traditions and cutting-edge innovation.

The new factory, with an initial annual output plan of 10,000 commercial energy storage batteries and a storage scale of nearly 40GWh, is set to begin construction in the first quarter of 2024 ...

As Lebanon accelerates its transition toward sustainable energy solutions, the newly announced shared energy storage project bidding has captured global attention.

To prepare for energy needs, Lebanon has set out to diversify its energy mix by adding more renewables. The micro-grid project combining PV and energy storage systems offers a possible way ...

Lebanon is undergoing a major energy transformation, with commercial & industrial (C& I) energy storage emerging as a powerful solution to combat chronic power outages, rising electricity ...

The Lebanon Nenghui site aims to change that narrative with its 200MW/800MWh capacity - enough to power 150,000 homes during outages. That's like giving every resident in Tripoli a personal backup ...

Renewable Energy Outlook for Lebanon, announcing in its Remap case that for Lebanon to reach its 30% target in 2030, it has to install 1000MW of wind, 601MW of hydro, 2,500MW of centralized solar ...

Imagine if... solar farms across Mount Lebanon could finally dispatch power after sunset. The storage system acts as a virtual transmission line, smoothing out renewable generation spikes through ...
