Does Mauritius produce electricity?

Electricity generation (production) in Mauritius has risen in tandem with consumption, roughly doubling from the early 1990s and growing ~50% since 2000. Figure 3 shows total annual generation (in GWh) versus total domestic consumption for 2005-2023.

Does Mauritius have a strong power sector?

Mauritius's power sector has experienced steady growth in demand over the past two decades, prompting continuous expansion of electricity generation capacity.

How much power does Mauritius have?

Overall, from 2005 to 2023 the peak grew by roughly 155 MW (+44%), while installed capacity grew by about 125 MW (+15%). Throughout 2005-2023, Mauritius maintained sufficient spare capacity above peak demand, crucial for reliability. For example, in 2015 capacity (882 MW) was nearly double the 460 MW peak.

How has Mauritius' electricity system changed over the years?

Over 2005-2023, Mauritius's electricity system grew significantly to meet rising consumption. Table 1 summarizes key indicators at selected years within this period, while the following subsections discuss major trends in capacity, demand, generation, and energy mix. Table 1 - Key Electricity Indicators for Mauritius (Selected Years)

This report provides a comprehensive analysis of electricity production capacity versus consumption in Mauritius from 2005 to 2025, using data from official ...

The access to electricity rate in Mauritius is relatively high at 98.8% and recovery rate of 99%. However, power supply remains heavily dependent on imported fossil fuels, which contribute to the country's ...

View all power outages across Mauritius and Rodrigues. At the CEB, we improve our electricity network by carefully planning power cuts. The power is off while our crews are working to make the network ...

Learn how Mauritius is tackling the challenge of its overwhelmed electrical grid, which is marked by unprecedented consumption peaks and ...

Mauritius electricity

At the Central Electricity Board (CEB), customer service and satisfaction are at the core of our mission. From individual interactions to the seamless operation of a reliable and responsive power system, we ...

The CEB is the sole supplier of electrical power in Mauritius, entrusted with the critical mission of ensuring the nation's energy needs are met reliably and sustainably.

Mauritius is facing a growing energy crisis, with peak electricity demand nearly matching its generation capacity. To address this, the government has proposed the use of a powership, a ...

The Ministry of Energy and Public Utilities is the National Focal Institution for SACREEE, and MARENA and EEMO are sectoral focal institutions for ...

Established in 1952 and empowered by the Central Electricity Board Act 1963, the CEB's business is to "prepare and carry out development schemes with the general object of promoting, coordinating and ...
