Postdoctoral Positions in Energy Transitions  
Position 1: Renewable energy-based autonomous self-healing microgrids in remote communities  
Project 2: Governance enablers & constraints for remote energy solutions  
Project 3: Leveraging energy transitions for the service of community well-being  
The project is focused on advanced renewable energy-based microgrid planning and operations in remote communities. The research will focus on developing an intelligent autonomous self-healing system, addressing four interrelated themes: condition monitoring, event detection and characterization; self-healing capability to achieve autonomous service...

Missing: Microgrid  
Must include: Microgrid  
HigherEdJobs  
Postdoctoral Scholar, Center for Microgrid Research  
The St. Thomas Center for Microgrid Research (CMR) is seeking candidates for a postdoctoral scholar position in the area of microgrid control. The scholar will be part of a rapidly growing team of ...

7 scholarship, research, uni job positions available microgrid positions available on scholarshipdb ,

This postdoctoral position at UEL's Sustainability Research Institute develops the London Renewable Energy Demonstrator Lab (LREL) for microgrid systems. The researcher will model ...

An immediate postdoctoral opening is available at the Center for Energy Systems Research (CESR), Tennessee Technological University, USA. The position focuses on the modeling and control of ...

Open Postdoctoral position, faculty mentor Meagan Mauter Stanford University | Stanford, California | United States | about 1 month ago would include: Co-developing a hybrid machine learning/process ...

We focus on applied innovation, turning science into meaningful environmental and societal impact. About the Role We are seeking a motivated and innovative Postdoctoral Researcher ...

Postdoctoral Positions in Energy Transitions The University of Saskatchewan, Canada, is inviting applications for 3 postdoctoral research positions in energy transitions. This is a unique ...

## Microgrid Postdoctoral

Our research spans blue/green infrastructure, sustainable materials and resources, and sustainable society. We are seeking a motivated and innovative Postdoctoral Researcher to lead cutting-edge ...

**Job Description:** Conduct research, design, and development of power electronic converters (DC/DC, DC/AC, AC/DC, multilevel) for EV charging and microgrid applications. Integrate renewable energy ...

Ensuring sustainable and resilient energy supply in such harsh environments requires advanced microgrid technologies. This project focuses on the design, development, and ...

The St. Thomas Center for Microgrid Research (CMR) is seeking candidates for a postdoctoral scholar position in the area of microgrid control. The scholar will be part of a rapidly growing team of ...
