---

The company has energy saving feedback technology, battery management and control, battery system integration and other technologies. The company mainly serves energy storage, power and other ...

The NT01 intelligent cloud diagnostic instrument can conduct tests on the battery pack and the entire system of new energy vehicles.

Whether you are assessing battery health, checking electrical circuits, or verifying charging stations, our NEV testing tools provide accurate results to support maintenance, repair, and inspection tasks.

It includes developing and validating battery management systems (BMS), analyzing the market, and testing battery storage systems in real-life scenarios. The aim is to extend the service life of the ...

Explore the evolution of multi-functional diagnostic devices integrating battery, motor, and control system analysis for next-gen new energy vehicles.

The battery package is compatible with the X431 PAD V and PAD VII. Use the Launch EV Diag Upgrade Kit (EV DIAGKIT) to diagnose battery pack State of Charge and State of Health on Tesla, BYD and ...

Launch X431 release new Energy Battery Pack adapters and activation card for specific electric vehicles to perform battery pack analysis. The EV Diag Kit is compatible with the X431 PAD V and PAD VII .

This versatile range caters specifically to EV battery pack testing needs, ensuring comprehensive and scalable solutions for validating and testing battery packs across various power capacities.

Explore Guheng Energy's diagnostic instruments for new energy vehicles: deep diagnostics, precise battery SOC testing, and comprehensive vehicle analysis.
