UK renewable energy developer Ethical Power has obtained planning consent for a 65MW solar PV development in Selwyn District, just outside Christchurch, New Zealand.

Discover the benefits, challenges, and future potential of solar energy in New Zealand -- from rooftop solar PV systems to emerging grid-scale opportunities.

The 104 ha solar array to be developed across a 111 ha site is adjacent to the Brookside 66 kV substation and will be hosted on land currently used for cattle grazing and will support primary ...

Nova Energy and Meridian Energy have partnered to construct the 400 MW Te Rahui solar farm, which will become the largest solar installation in New Zealand.

One of the solar tracking systems that we constructed is in Brookside, New Zealand. This site in Arundel just south of Ashburton is one of Kea Energy's PPA valued customers. This site near Bankside has ...

Selwyn District Council granted consent for the project in May 2024. The proposed Buckleys Road site is adjacent to the Brookside 66kV substation and has close access to the grid ...

Following consent approval and final investment decision, construction could start in 2026, and the site could be up and running late in 2027. This is part of Contact's 50/50 joint venture with Lightsource bp ...

Below are summaries the major recent, ongoing, as well as planned projects in the energy sector in Tokelau: The goal of this major project was a fully functional power generation and distribution ...

Named Buckleys Road Solar Farm, the project, being developed in partnership with KeaX Limited, features 104 hectares of solar arrays across a 111-hectare site. The operational generating ...

Over 200MW of new solar PV capacity will be brought online in New Zealand following two new

New Zealand s Ke Telecom PV Site

partnerships established in the last week. The larger of the two sees Aquila Clean Energy ...
