What types of circuit breakers are used in Australia?

C curve breakers are the most common type used in Australian installations. D-Curve Circuit Breakers: D-curve breakers are designed to handle high inrush currents and trip when the current reaches 10-20 times the rated current. They are often used for highly inductive loads, such as transformers or motors with significant startup current.

What types of breakers are available?

A complete range of panel & flush mount breakers for both low and high current applications. Plus specialist auto blade fuse breakers, auto-reset, PCB, stud surface mount types and rocker switch breakers for protecting equipment from circuit issues. Thermal breakers provide excellent protection for equipment exposed to high temperature conditions.

What are the different types of circuit breakers?

Single-phase, double-phase, and three-phase circuit breakers play vital roles in protecting electrical circuits. Single pole circuit breakers, commonly known as 1 pole breakers, are often used in residential, commercial and industrial applications.

Are circuit breakers safe in Australia?

Yes, all our circuit breakers comply with Australian standards, including AS/NZS 3000:2018, ensuring they meet the necessary safety and performance requirements for electrical installations in Australia. Can I use these circuit breakers in a caravan or RV? Absolutely.
