Concrete solar ballast units are used for flat ground and roof-mounted applications requiring ballast weight to secure panel arrays and provide the dispersion of point loads without the need for roof or ...

Manufactured in a standard size, each solar ballast ...

Our Weight blocks are purposefully designed to hold solar panels securely in place. They provide the necessary support and stability, especially in rooftop installations where drilling into the surface is not ...

Manufactured in a standard size, each solar ballast block weights approximately 32 lbs. Ballast Blocks are a durable and simple way to add ballast weight to your solar panel array preventing movement ...

We manufacture several sizes and weights of products that are specifically designed for the strict quality requirements of the solar panel industry. High compressive strength and density combined with low ...

Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our ballast blocks are available in a wide range of sizes, weights and mixes.

The Solar Panel Ballast Blocks provided by RCP Block & Brick are a durable and simple way to add ballast weight to your solar panel array. Trusted and used by professional solar energy system ...

Manufactured to meet ASTM C90 and C1491 specifications, these ballast blocks ensure durability and reliability. Each pallet includes 30 units of our Solar Panel Ballast Blocks, ensuring convenient bulk ...

Solar Ballast blocks are specifically designed for freeze thaw durability and work with solar panel racking systems. Conforms to ASTM C1491-14 and C1884-18...

Solar panels in zero-penetration, flat-roof applications require ballast weight to secure the panel to the roof. Applications include flat roofs when non-penetrating options are preferred. Solar ballast block ...

Photovoltaic panels block 5cm

These durable, easy-to-install blocks are designed specifically to keep solar arrays firmly in place, providing a strong foundation that doesn't require roof penetration.
