Map services and data downloaded from the U.S. Large-Scale Solar Photovoltaic Database are free and in the public domain.

Each quarter, NREL conducts a presentation of technical trends within the solar industry.

California, Texas, and Utah each installed more than 1 GW of capacity. In the months following the passage of the One Big Beautiful Bill Act (OBBBA), the solar industry has been ...

Most operational CSP stations are located in Spain and the United States, while large solar farms using photovoltaics are being constructed in most geographic regions. The worldwide growth of ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Solar PV manufacturing capacity and production by country and region, 2021-2027 - Chart and data by the International Energy Agency.

In 2023, China installed the largest share of the world's new solar photovoltaic (PV) capacity, at 58 percent of the total capacity.

Data and analysis including a list of solar power in every country in ...

Photovoltaic panels released by the country

Installed solar energy capacity Cumulative installed solar capacity, measured in gigawatts (GW).
