The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification.

With over 200 hectares of land dedicated to solar panels, this project will provide electricity to over 25% of Guinea-Bissau's population while also reducing greenhouse gas emissions by over 10%.

Electricity-starved Guinea Bissau will get \$48m from the International Development Association, Green Climate Fund and Esmap to catalyse solar energy generation and improve on ...

The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea-Bissau.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to ...

The World Bank has announced substantial financial support for an innovative solar power project in Guinea-Bissau aimed at reducing carbon emissions and increasing electricity access.

The massive solar and storage project in Guinea-Bissau is set to revolutionize the country's energy sector. With over 200 hectares of land dedicated to solar panels, the project will provide electricity to ...

The project focuses on the construction of several solar power plants and battery power storage units, with private-sector participation. A 30 MWp solar power plant will be built near Bissau to reduce the ...

The World Bank will support the development of the first solar power plants in Guinea-Bissau with a \$35 million grant.

Power generation of 1 watt solar panel in Guinea-Bissau

Private capital mobilized or leveraged for investments in solar generation (solar power plants or solar-based mini grids). Greenhouse gas emissions displaced as a result of the project. This indicator ...
