Oilprice offers real-time oil prices for over 150 global crude blends and indexes, with live charts, comparisons, and smart analytical tools used worldwide.

Oil prices opened the first trading session of 2026 slightly higher, supported by geopolitical tensions and new U.S. sanctions on Venezuela, despite lingering oversupply and weak demand growth.

California gas prices are projected to surge past \$5 per gallon by 2026 due to a dwindling number of in-state refineries, contrasting with a general downward trend in U.S. gas prices.

The cost of solar panels has dropped by more than 80% over the past decade, making them more affordable than ever. The total price depends on the size of the system, the type of ...

In 2025, the European solar market is expected to maintain strong growth, driven by policy support, technological advancements, and cost reductions.

Thanks to a mix of supportive government policies, competitive installer markets, and a strong push for renewable energy, many European countries now offer some of the lowest solar ...

Oil markets responded to a raft of (mostly) negative catalysts throughout the year. Oil prices fell in the first half of the year due to slowing economic activity taking a toll on global oil demand.

According to the latest data, prices for PV modules in Europe remained steady across all segments in October 2025. This stability is a stark contrast to previous months, which saw significant ...

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low ...

Prices of solar photovoltaic panels in Europe

Prices are compiled from three sources: Nemet (2009) for 1975-2003, Farmer & Lafond (2016) for 2004-2009, and IRENA for 2010 onward. Due to limited data availability, we use the Global ...

Aluminum prices are climbing on the back of Chinese production caps, supply disruptions, and surging demand from EVs, defense, and infrastructure sectors.

Oil prices fell due to concerns about President Trump's tariffs and potential global recession, with West Texas Intermediate crude briefly dipping below \$60 per barrel.
