---

We explore the nine most exciting developments in the solar industry in 2025, from indoor solar panels to "two-for-one" fission.

This article explores recent advancements in solar panel technology, policies encouraging adoption, leading states, and prospects for solar energy in the US by 2025.

All the top recent events in solar thermal and photovoltaic market. The latest research, innovative technologies, industry trends and forecasts, financial news, large projects, governmental ...

Explore the latest solar panel technology, new solar panel technology, and solar energy technology trends improving efficiency.

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to ...

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Latest news on the solar energy and photovoltaics industry in the USA: installations, manufacturing, markets & policy, and technology.

# Recent information on photovoltaic panels

Nov. 29, 2025 Quantum communication is edging closer to reality thanks to a breakthrough in teleporting information between photons from different quantum dots--one of the biggest ...
