OverviewGovernment policy and incentivesCharging infrastructurePublic opinion and barriersSince 2017, the electric vehicle (EV) market in Italy has transitioned from a marginal niche into a significant segment of the national automotive industry. The market's evolution has been characterized by an early phase of exponential growth (2017-2021), a period of stagnation influenced by energy costs and supply chain volatility (2022-2023), and a definitive structural rebound in 2025. As of 31 December 2025, battery electric vehicle (BEV) registrations reached an all-time high of 94,97...
