-----

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate renewable energy round the clock, a landmark in clean ...

When the sun is no longer out, the heat from the salt continues to make steam -- meaning this is solar power that can run 24/7. To maximize the amount of sunlight gathered, the ...

Two 650-foot-tall (200-m) towers have risen in China's Gansu Province. Combined with an array of 30,000 mirrors arranged in concentric circles, the new facility is expected to generate over 1.8...

In a first, China has switched on a solar thermal power station in the Gobi Desert, a project described as a more cost-effective and efficient use of the technology, with the potential to be scaled ...

China has reportedly developed the world's first dual-tower solar thermal plant near Guazhou County in Gansu Province to enhance efficiency and reduce carbon dioxide emissions.

China has achieved a groundbreaking advancement in renewable energy technology with the recent inauguration of the world's first solar-thermal power plant, which employs a dual-tower ...

Designed by the Northwest Electric Power Design Institute, the Hami Solar Thermal Power Plant is among China's first generation of solar thermal power demonstration projects and the...

This major project, known as the "Super Mirror Power Station", not only demonstrates China's leading level in the field of solar thermal power generation technology, but also provides ...

The power station is located in Guazhou County in Gansu Province, in northwestern China. Unlike most solar thermal plants that use a single tower, this facility features two towering ...
