To realize the goal in 3 years of implementation, the project will focus on assessing the current status and potential for agricultural photovoltaics development in Vietnam, thereby providing ...

Vietnam has taken a significant step in its renewable energy journey with the official launch of its first agri-solar power research project, aiming to uplift rural incomes while supporting the ...

Agri-voltaics, or co-development of solar power and agriculture, provide an innovative solution to meet Vietnam's rapidly rising electricity demand.

The project supports capacity development and mobilises funding for the introduction of photovoltaics in Vietnam's agricultural sector.

It marks the first project in the agricultural sector that focuses specifically on solar energy for rural households. Speaking at the launch, Deputy Director General of MAE's International ...

Vietnam has launched its pioneering first agri-PV project in Ninh Thuan Province, an innovative model that integrates agriculture with solar energy. This dual-use approach combines ...

The Agri-photovoltaics for rural areas in Vietnam (Agri-PV) project was officially unveiled in Hanoi on September 9 by the Ministry of Agriculture and Environment (MAE) in partnership with ...

In a groundbreaking move to merge renewable energy with agricultural innovation, Vietnam has launched its first research initiative to integrate solar power into rural farming practices.

GIZ, a Germany-headquartered international development agency working in renewable energy and agriculture, has partnered with Vietnam's Ministry of Agriculture and Environment (MAE) ...
