What does NDRC stand for?

On August 3, 2023, China's National Development and Reform Commission (NDRC), the Ministry of Finance (MoF), and the National Energy Administration (NEA) jointly issued the " Notice on Full Coverage of Renewable Energy Green Power Certificates to Promote Renewable Energy Electricity Consumption " (NDRC Document No. 1044) (" Document 1044 ").

How does the New Energy Directive affect new energy projects?

Under the new directive, all electricity generated by new energy projects--including wind and solar--must enter the power market, with grid tariffs determined by market transactions. A key aspect of the reform is the differentiation between existing and new projects.

What is a renewable power reform?

The reform focuses on three key aspects: allowing market forces to determine renewable power pricing, establishing a pricing and settlement mechanism that supports the long-term sustainability, and adopting differentiated policies for existing and new projects.

What does the New Energy Directive mean for companies?

More than just a reform, it serves as a litmus test for companies' core competitiveness. Under the new directive, all electricity generated by new energy projects--including wind and solar--must enter the power market, with grid tariffs determined by market transactions.

Eligible types now include all wind power (including distributed and offshore wind), all solar power (including distributed and utility-scale solar), hydropower, biomass-to-power, geothermal power, and ...

These certificates allow renewable energy producers to monetize their production while providing other consumers with a means to offset the use of electric power from traditional power ...

Approved 200 methodologies in 12 batches, approved 9 exchanges in 4 batches, approved 10 verification bodies in 5 batches, another 2 verification bodies were approved in 2017.

The National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) have issued a notice on promoting the integration of new energy sources like ...

Solar power generation NDRC approval

China highly values the new energy sector, such as wind and solar power, rolling out an array of favorable policies spanning pricing, finance and industry. The supportive measures, ...

On February 9, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued a document No. 136. This document is a ...

In recent years, China has made significant strides in the pursuit of renewable energy, particularly through solar power. The National Development and Reform Commission has outlined a ...

This article provides a detailed overview of solar energy regulations and permits, emphasizing their relevance and importance in facilitating the growth of solar energy.

Last week, China's National Development and Reform Commission (NDRC), Ministry of Finance (MoF), and the National Energy Administration (NEA), released NDRC (2023) Document No. 1044, with the ...
