Despite the blow that tax credit repeal would deal to renewable energy project values, analysis from Lazard finds that solar and wind energy projects have a lower levelized cost of ...

"We are no longer allowing businesses to use your taxpayer dollars to fund solar projects on prime American farmland, and we will no longer allow solar panels manufactured by foreign ...

Here's the truth: solar energy is the most cost-effective form of new electricity generation in the United States, even without subsidies. It's fast to deploy, requires no fuel, and delivers ...

The government delivered a shock to the renewable energy industry when it took away subsidies for solar and wind as part of the One Big Beautiful Bill Act. It's a shock the industry can...

The two renewable sources have been cheap relative to natural gas-fired power without subsidies for at least a decade. Utility-scale solar today is 84% cheaper than it was 16 years ago; ...

Subsidies are meant to drive prices down and boost supply. But subsidizing wind and solar has done exactly the opposite.

A lack of federal support has caused many to declare that renewables as a source of energy in the United States are on the decline.

This year's report concludes that renewables are the "most cost-competitive form of generation," even without subsidies. "As such, renewable energy will continue to play a key role in the...

Enormous subsidies for solar and wind generation technologies are proving much more expensive than advertised. They also carry hidden costs and burdens on the grid, most recently seen ...

Not only does solar power receive tax subsidies, but it has also garnered sizable federal loans, particularly

Solar power generation has no subsidies

during the Obama-Biden administration. Solar plants are touted to operate for ...
