Croatia's solar market benefits from strong household adoption and public sector involvement, but unlocking the full potential of utility-scale projects requires overcoming regulatory ...

By the end of 2024, Croatia had reached 3.8 GW of installed renewable energy capacity, with solar energy doubling its figures in one year. By 2025, photovoltaic power is expected to exceed ...

District heating operators in Croatia have shown great interest in solar energy. Under the auspices of an EU-funded two-and-a-half-year project called KeepWarm, three feasibility studies on solar district ...

Croatia possesses significant renewable energy potential, primarily due to its abundant resources in hydropower, wind, geothermal, and solar energy. Despite limited domestic reserves of fossil fuels, ...

Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity. At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants and 222.0 MW i...

The Croatian government is harnessing the power of solar energy, planning to allocate a noteworthy EUR25 million specifically for the development of solar plants and heat pumps across the ...

As the country seeks to reduce its reliance on fossil fuels, solar energy offers a clean and sustainable alternative. The expansion of solar capacity will not only contribute to Croatia's ...

Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable Energy Sources of Croatia Association (RES Croatia). The total figure...

Thermal power plants fuelled by coal and gas take third place, with a combined capacity of 1.285 gigawatts. Photovoltaics come next, with 902 megawatts of grid-connected capacity; off-grid ...

Solar thermal energy croatia

Croatia offers many opportunities for developments in the renewable energy sector, particularly solar energy. The country has one of the highest insulations in the EU, between 2000 and 2700 hours of ...
